

Join Us for a New Series on COVID-19 Best Practices in Nursing Homes

[More details on our website here](#)

We are pleased to announce a new initiative aimed at identifying and sharing COVID-19 lessons learned in the preparedness, management, and treatment of the novel coronavirus in nursing homes.

The COVID-19 Best Practices in Nursing Home tele-ECHO will meet twice-monthly to examine topics that range from acquisition of PPE and medication management to reopening guidance and end-of-life decision making amid COVID.

Session 1 (July 15)

Reopening Considerations, Plans & Processes

Register [HERE](#)

Session 2 (July 29)

Preparing for a Potential Second Wave

Register [HERE](#)

Session 3 (Aug. 12)

Dealing with Trauma and Grief

Register [HERE](#)

All sessions are FREE to nursing home providers and professionals, thanks to a grant from the Robert Wood Johnson Foundation.

The ECHO Model™

Spreading *knowledge*, expanding *capacity* & accelerating *collective wisdom*.

THE GREEN HOUSE PROJECT & PROJECT ECHO

COVID-19 BEST PRACTICES IN NURSING HOMES

HOW IT WORKS

1. PROJECT ECHO'S ZOOM TELE-MENTORING PLATFORM

Project ECHO's innovative Zoom format enables multiple practitioners to meet via video in real-time to share and learn from each other.

2. THE GREEN HOUSE MODEL'S UNIQUE SUCCESS WITH ECHO & COVID-19

GHP's previous experience with Project ECHO combined with the model's success in managing the coronavirus creates a synergistic relationship.

WHAT'S IN IT FOR YOU?

3. REAL-TIME SHARING, LEARNING, AND COLLABORATING

Each session includes a didactic portion offered by a subject matter expert, a provider-shared case scenario, Q&A, and participant polls.

4. TWICE-MONTHLY SESSIONS ENABLE PROVIDERS TO LEARN & APPLY IMMEDIATELY

Participants learn, share, and gain knowledge that can be applied immediately so elders and staff benefit right away.
